

# SUPER AG GYPSUM

**“At last, a guaranteed high purity, high performance agricultural gypsum”**

**REGYP**

## WHY SUPER AG GYPSUM?

- REGYP is offering SUPER discount wholesale prices on SUPER AG Gypsum;
- SUPER AG Gypsum provides the best dollar per tonne value; and
- SUPER AG Gypsum is a high performance pre-digested source of calcium and sulphur suitable for agricultural applications using ground and aerial spread techniques;

When comparing gypsum sources, it is best to accurately compare the cost per unit of calcium and sulphur. REGYP is a high purity gypsum source which contains more calcium and sulphur, leading to a greater effect with each application. Download the “Gypsum Cost Comparator” at [www.regyp.com.au](http://www.regyp.com.au) or email [info@regyp.com.au](mailto:info@regyp.com.au).

**REGYP**

## WHAT DOES THIS MEAN?

By using the high performance SUPER AG Gypsum you will benefit from:

- its increased solubility, up to 4 times more than other mined sources;
- lower applications rates (up to 15%) due to its much higher purity than most NSW mined gypsum sources, saving you money;
- further application savings through increased spreading widths over mined sources (widths up to 17-19m); and
- its porous structure provides more surface area than conventional Ag gypsum sources.

This quality means the SUPER AG Gypsum will fully dissolve into the soil solution at a much faster rate and leave no un-dissolved gypsum particles.

**REGYP**

## LOCATIONS

REGYP is operating from Sydney and Cowra, providing good geographical coverage. This enables REGYP to offer very competitive landed prices compared to other gypsum sources in NSW. Please call for transport prices and/or landed costs to your area.
